

WEEKLY PROJECT PROGRESS REPORT (WPPR)

For week commencing 04 April 2026

Programme:	BCA (Artificial Intelligence, Cloud Computing & Devops)
Student Name:	Muhammed Umer Sufaidh
WPPR:	WPPR 05
Register Number:	23BCAICD085
Campus ID:	27079
Project ID:	PRJN26-055
Major Project Title:	Multi-Cloud Hybrid Strategy for Agriculture
College:	YENEPOYA INSTITUTE OF ARTS, SCIENCE, COMMERCE AND MANAGEMENT
Course:	BCA (Artificial Intelligence, Cloud Computing and DevOps) With IBM & TCS
Semester:	VI Semester
Academic Year:	2023-2026
Internal Guide:	Internal Guide

Targets Set for the Week:

- Implement Google Drive backup function
- Configure Google Drive Desktop folder sync path
- Test file upload to Google Drive
- Verify backup files appear in the correct Drive folder
- Handle Google Drive sync errors gracefully

Progress / Achievements for the Week:

1. Implemented backup_google_drive() function that copies all agriculture files to the Google Drive Desktop sync folder (G:\My Drive\AgriBackup) using shutil.copy2().
2. Configured the Google Drive Desktop sync path and verified the folder ID (13FzUzFp5199i9OIx3E89rFF_Ly5Lu8Nf) corresponding to the AgriBackup folder in Drive.
3. Successfully tested Drive backup: all 5 agriculture files were copied to the sync folder and verified to appear in Google Drive within minutes of syncing.
4. Added os.makedirs() with exist_ok=True to auto-create the sync folder if it does not exist.
5. Logged upload count and individual filenames for each successful Drive backup operation.

Future Work Plans:

- Implement the AWS S3 backup function using boto3

- Test S3 upload with access key and secret key credentials
- Add per-file error handling for S3 upload failures
- Combine all three backup methods into the failover controller

Implementation Shown:

Implementation Shown: **Yes**
