

WEEKLY PROJECT PROGRESS REPORT (WPPR)

For week commencing 18 April 2026

Programme:	BCA (Artificial Intelligence, Cloud Computing & Devops)
Student Name:	Muhammed Umer Sufaidh
WPPR:	WPPR 07
Register Number:	23BCAICD085
Campus ID:	27079
Project ID:	PRJN26-055
Major Project Title:	Multi-Cloud Hybrid Strategy for Agriculture
College:	YENEPOYA INSTITUTE OF ARTS, SCIENCE, COMMERCE AND MANAGEMENT
Course:	BCA (Artificial Intelligence, Cloud Computing and DevOps) With IBM & TCS
Semester:	VI Semester
Academic Year:	2023-2026
Internal Guide:	Internal Guide

Targets Set for the Week:

- Build Streamlit web UI in app.py
- Integrate app.py with backup.py module
- Test all buttons and UI interactions
- Finalize project documentation and prepare project report
- Conduct final end-to-end system demonstration

Progress / Achievements for the Week:

1. Built complete Streamlit web application (app.py) with a clean UI titled 'Agriculture Multi-Cloud Backup System', integrating all backup.py functions as callable buttons.
2. Added four action buttons: (1) Create Sample Data + Full Backup, (2) Run Backup Only, (3) Test Local Backup Only, (4) Show Backup Log, (5) Show Last Backup Summary - all working correctly.
3. Implemented a configuration expander showing live CONFIG values (source dir, backup dir, GDrive folder ID, S3 bucket name, AWS region) for transparency.
4. Performed a final end-to-end test via the Streamlit UI: all three backup methods (Local, Google Drive, AWS S3) completed successfully. last_backup_summary.json confirmed all true at timestamp 2026-04-26T02:06:53.
5. Completed the project report, prepared the weekly progress reports (WPPR 01-07), and organized all deliverables: backup.py, app.py, service_account.json, backup_log.txt, and last_backup_summary.json.

Future Work Plans:

- Project is complete. Future enhancements may include: scheduled automated backups using cron/task scheduler, email notifications on backup failure, encryption of backup files before upload, and support for Azure Blob Storage as a fourth cloud option.

Implementation Shown:

Implementation Shown: **Yes**
